Overview

# UAE ON FUTURE SUSTAINABILITY

**What is UAE doing to be sustainable?**

The UAE has pledged to reach zero **WASTE BY 2030 & Net 0 carbon emissions by 2050** and announced it would invest \$163 billion in clean and renewable energy and key technologies.

AL QAISAR RECYCLING WEEE L.L.C

H.H Sheikh Mohamed bin Zayed Al Nahyan  
President  
United Arab Emirates

## Overview

# UAE ON FUTURE SUSTAINABILITY

### Government Initiatives :

The government has collaborated with various stakeholders to create awareness campaigns, educating the public on the importance of responsible e-waste management. **The amount of electronic waste in landfills worldwide is forecasted to reach 74 million tons a year by 2030, according to the Waste Electrical and Electronic Equipment Forum.** But there's an alternative to this "take-make-waste" model. Businesses are adopting circular economy methods to keep gadgets, batteries and cables plus the valuable metals and other materials they contain out of terrible dumps by reusing, refurbishing, or recycling them instead.

**UAE VISION 2030: Zero WASTE BY 2030**

Crown Prince &  
Chairman of Executive Council  
AJMAN

The amount of electronic waste in landfills worldwide is forecasted to reach 74 million tons a year by 2030, according to the Waste Electrical and Electronic Equipment Forum.

The UAE government has taken proactive steps to address the escalating issue of e-waste. Legislative measures and policies have been implemented to regulate the disposal of electronic devices responsibly. One such initiative is the National Program for Integrated Sustainable Solid Waste Management, which aims to minimize the environmental impact of waste, including e-waste, by promoting recycling and sustainable disposal methods. The government has collaborated with various stakeholders to create awareness campaigns, educating the public on the importance of responsible e-waste management. Businesses are adopting circular economy methods to keep gadgets, batteries and cables plus, the valuable metals & other materials, they contain – out of terrible dumps by reusing, refurbishing, or recycling them instead.

**The United Arab Emirates (UAE) has witnessed a remarkable transformation in the digital realm, becoming a vibrant hub for the electronics industry. However, this progress has brought with it a pressing concern: electronic waste, or e-waste. Managing this burgeoning issue poses significant challenges that extend beyond mere waste disposal, and include environmental impact, regulatory compliance, and the adoption of best practices. Here , we delve into the hurdles and potential solutions for e-waste management & recycling in AJMAN within UAE.**

## UAE ON FUTURE SUSTAINABILITY UAE VISION 2030: Zero WASTE BY 2030

The UAE generates a staggering 162 kilotons of e waste annually and is experiencing a formidable environmental challenge in managing its disposal due to the presence of hazardous materials like lead, mercury, and cadmium. Globally, e-waste represents 5% of the waste generated, but 70% of the toxic waste around the globe is from e-waste. When improperly discarded, these toxic components can seep into the soil and water, posing substantial threats to ecosystems and human health. Globally, the World Economic Forum reports that only 20% of the e-waste is formally recycled, and the remaining 80% goes into landfills or enters the informal economy, and 4% remains as household trash. To mitigate the problems associated with e-waste, it must be recycled.

## Crown Prince of Ajman launches 'Ajman Vision 2030'

AJMAN, 7th March, 2024 (WAM) Under the patronage of H.H. Sheikh Humaid bin Rashid Al Nuaimi, Supreme Council Member and Ruler of Ajman, H.H. Sheikh Ammar bin Humaid Al Nuaimi, Crown Prince of Ajman and Chairman of Ajman Executive Council, has launched "Ajman Vision 2030", which marks the culmination of collaborative efforts from various governmental and societal entities within the emirate, crafting a comprehensive roadmap toward the future. Sheikh Ammar outlined that the Ajman Vision is based on eight fundamental principles: sustainability, inclusivity, community centrality, governmental agility, future preparedness, accountability, cooperation, and the spirit of union. The Ajman Executive Council will ensure adherence to them and disseminate their culture. The vision calls for building a flexible and sustainable society, where economic development is balanced with caring for the social dimensions and preserving the environment, he noted. "We will work hard to achieve this ambitious vision, with a focus on meeting the aspirations of the emirate of Ajman and achieving the main goals of our sustainable vision."

## Crown Prince of Ajman launches 'Ajman Vision 2030'

Ajman is committed to a sustainable future. The emirate will promote economic activities with high added value and specialized knowledge, meet the economic and social needs of the population while ensuring environmental sustainability, become a results-based government, and shift spending towards achieving the most important long-term results. The Ajman government is committed to achieving these goals through a comprehensive and coordinated approach that involves all stakeholders. One of the vision's goals is to improve environmental sustainability by achieving sustainable waste management, reducing pollution, improving energy efficiency, increasing the use of alternative energy, protecting biodiversity, and preserving natural resources. This also requires improving financial performance and increasing focus on results through preparing a results-based budget and measuring performance, involving the community and stakeholders in decision-making, and facilitating their access to information.

## OUR VISION

**Our vision** is to create a futuristic, affordable, and sustainable society that's conscious of limited planetary resources.

## OUR MISSION

**Our Mission** is to reduce electronic waste by creating a circular economy where obsolete equipment is repurposed rather than being buried in landfill.

## Vision & Mission AL QAISAR RECYCLING

# RECYCLING OF WASTE ELECTRICAL & ELECTRONIC EQUIPMENT (WEEE)

## INTRODUCTION

At **AL QAISAR RECYCLING**, we believe in the power of revitalizing IT products for a sustainable future. With a commitment to innovation and excellence, we strive to redefine the way businesses and individuals perceive and utilize renewed IT equipment over all within UAE. Data security and privacy are paramount considerations in our operations. We have stringent protocols in place to ensure the secure handling and erasure of data from electronic devices. Before any device undergoes recycling, our certified technicians perform thorough data wiping procedures to permanently remove all sensitive information. We adhere to industry standards and regulations to safeguard data privacy throughout the recycling process, providing our clients with peace of mind that their data is handled securely.

**Our tailored solutions  
prioritize Data protection,  
asset removal, compliance,  
And environment friendly  
Practices to meet the specific  
needs of enterprises and  
individuals.**

**About Us**  
**AL QAISAR RECYCLING**

# RECYCLING OF WASTE ELECTRICAL & ELECTRONIC EQUIPMENT (WEEE)

## INTRODUCTION

**Al Qaisar Recycling**, certified company that exhibits a commitment to its business partners across the world. Al Qaisar Recycling is contributing a healthy share to preserving the environment by treating waste electrical & Electronics Equipment (WEEE) responsibly. This allows us to provide businesses with quantifiable results that can count as carbon credits for Companies. Al Qaisar Recycling specializes in the collection, tracking, and end-use scenario for data center equipment, computers, servers, communication hardware, cable boxes, streaming devices, DVRs, modems, or other similar electronic equipment. Compliance with all applicable standards and laws. Al Qaisar Recycling segregates the collected electrical equipment into useable and non-useable. Non-useable devices are dismantled so that individual components inside the device can be removed.

**Al Qaisar Recycling** of Waste Electrical and Electronic Equipment (WEEE) (UAE) is a registered entity and reserves the right to process electrical waste. Al Qaisar executes legal, transparent, and trackable responsible e-waste recycling, data wiping & asset management processes according to international standards. Such as:

- **R2V3- Responsible recycling**
- **ISO 9001: 2015 - Quality Management System**
- **ISO 14001:2015 - Environmental Management System**
- **ISO 45001:2018 - Occupational Health & Safety Management System**
- **ISO 27002:2022 - Information Security Management System**
- **ISO 27001:2013 - Information Security Management System**

## About Us

# AL QAISAR RECYCLING

# RECYCLING OF WASTE ELECTRICAL & ELECTRONIC EQUIPMENT (WEEE)

## INTRODUCTION

At Al Qaisar, No matter whether we're processing state- of-the-art servers from a hyper-scale data center, or DVRs from 10 years ago, **Al Qaisar Recycling** knows how to maximize the resources that make up modern electronics. Reusing these valuable commodities reduce the carbon footprint of an entire society. We recover valuable materials from old electronic devices rather than disposing of them in landfills. Recycling not only conserves resources but also prevents hazardous materials from entering the environment. Our goal is to provide innovative and environmentally friendly solutions for electronic waste management. We aim to contribute to a cleaner and healthier planet by promoting the circular economy through responsible recycling & remarketing of IT products.

**Al Qaisar Recycling utilizes several highly-efficient proprietary processes to identify and separate viable components for reuse.**

# RECYCLING OF WASTE ELECTRICAL & ELECTRONIC EQUIPMENT (WEEE)

## WHAT SETS US APART?

### Reliability:

Our renewed IT products undergo rigorous testing and quality assurance processes to ensure reliability and performance.

### Sustainability:

By choosing renewed IT equipment, customers contribute to reducing electronic waste and promoting environmental sustainability.

### Affordability:

We offer competitive prices on high-quality refurbished IT products, providing cost-effective solutions for businesses and individuals.

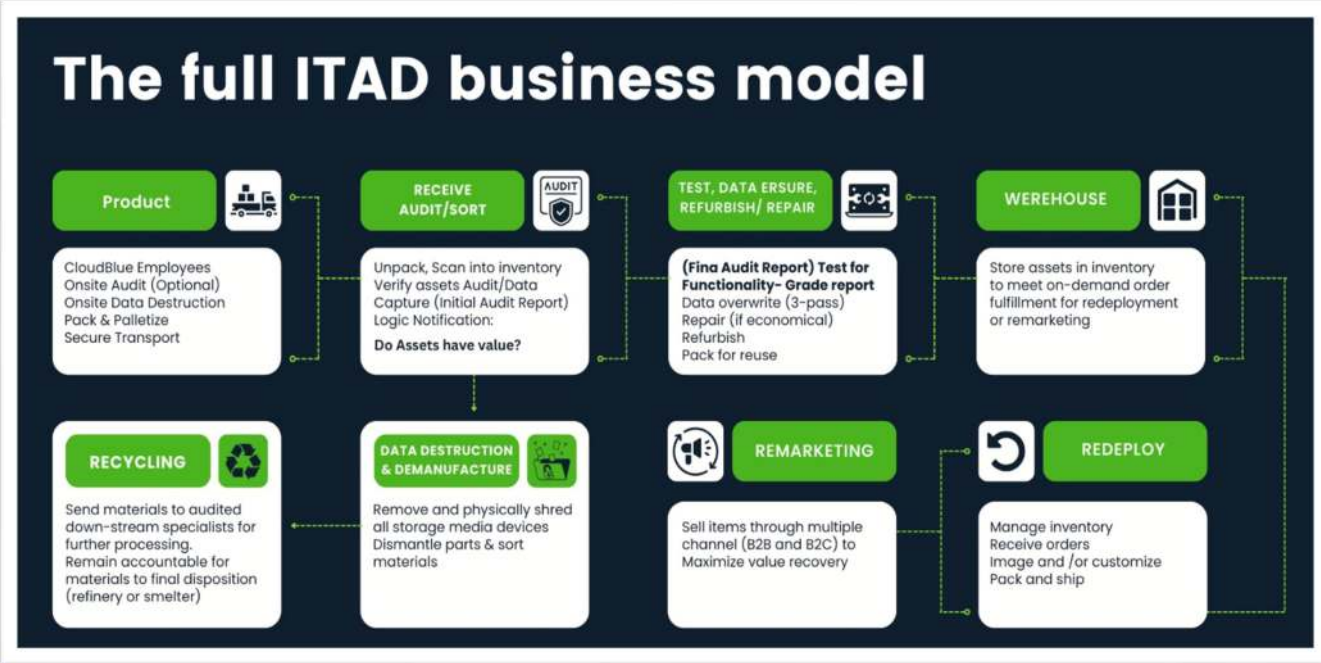

### Expertise:

With years of experience in IT remarketing, our team has the expertise and knowledge to meet the diverse needs of our customers.

## WHAT WE OFFER?

Our vast experience in decommissioning IT equipment makes us experts in secure IT disposal and IT recycling services. By recycling computers and electronics equipment in large quantities, along with approximate value that we can achieve for your organization.

Potentially it's a great additional revenue stream for a business that requires regular rollouts. With a network of secure buyers throughout the UAE, we minimize time and increase revenue for your organization. Our team also offers data wiping, IT Asset Management services along with professional computer recycling and IT disposal services & solutions.

**Sell your used IT equipment,** We perform IT recycling on the following equipment:

- Servers
- Data storage
- Workstations
- Laptop (Apple, HP, Dell, Lenovo etc.)
- Networking equipment
- CISCO SYSTEM (Switches, Routers, Firewall, Controllers & access point)
- Used server parts & accessories
- UPS, PDU, Batteries
- Desktop, LCD Monitors, POS Devices
- Modern Communication Devices
- Security Cameras
- Electronic Home Appliances

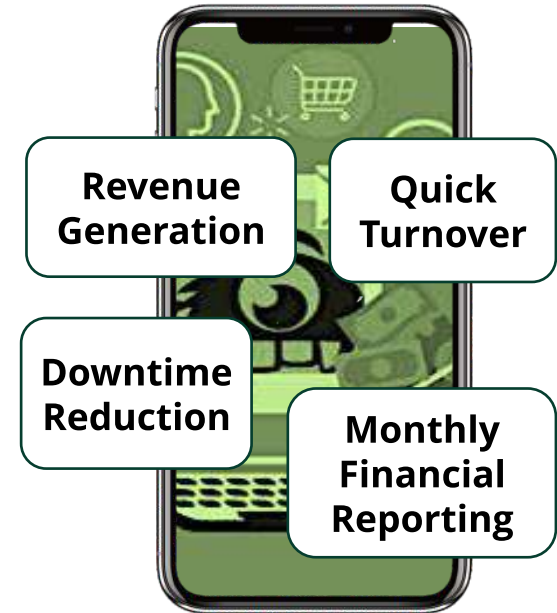

## Recycling Solutions AL QAISAR RECYCLING
